	INSTRUCTIONS	

Thermostat Setting

The thermostat automatically regulates the temperature inside the cooler and freezer compartments.

Refrigerator temperatures can be obtained by rotating the knob to higher numbers; 1 to 3, 1 to 5

Thermostat settings:

1 – 2 : For short-term storage of food

3 – 4 : For long-term storage of food

5 : Maximum cooling position. The appliance will work longer. If required, change the temperature setting.

Replacement of LED

Screwdriver into the gap and remove the led cover.

Remove screw led

Disconnect the connector and change the led.

Connect cables as shown below

Send the thermostat bulb pipe throughout the hole until it end

Plug the black socket to the fridge

Close the lamp cover ve screw is tightened which are attached one side of the thermostat.

STATIC COMBI 252-266-278

INSTRUCTIONS

Door Gasket Change

Pull the gasket towards starting from top right corner
Slowly pull the rest of the gasket.
Completely remove the gasket from door.

Check the replacement gasket form
Starting with upper right corner, press on the gasket until it fits to its place..
Place the other sides of the gasket with the help of your thumb

After the replacement check if there any non-fitting point on the gasket. Also check if there any opening at the gasket while the door is closed. If so that might cause condensation/icing or insufficient cooling/freezing. To prevent this soften the form of the gasket with the help of a hair dryer or hot water and make sure that all points are closing perfectly.

STATIC COMBI 252-266-278

INSTRUCTIONS

Removing/Assembling The Door Switch

1. Stick a tape to protect the body plastic. Flex it with the help of a tool like a slotted screwdriver.

2. Also flex the top-side of the switch and then displace by pulling.

3. Put the switch connector cable in the housing. First place the top-side of the switch and then push the bottom side.

4. After the switch is placed, complete the assembly by pushing.

INSTRUCTIONS

Thermostat Setting

Thermostat Control

- This knob is used to control the temperature of the freezer and refrigerator parts automatically. It can be set to any value between “0” and “5” positions.
- “0” position indicates that the thermostat is “off”. The refrigerator is “off” on this setting.
- By turning the knob between “1” and “5”, you can increase or decrease the cooling degree.
- The refrigerator is designed to get optimum performance when the thermostat knob is set between position “2” to “4”.

Replacement of Refrigerator Lamp

- 1- Unplug your fridge.
- 2- Remove the cover of the box from the claws using a screwdriver.
- 3- Replace with a bulb of maximum 15 Watts.
- 4- Install the cover.
- 5- Wait for 5 minutes before re-plugging and bring the thermostat to its original position.

**STATIC COMBI 252-266-278****INSTRUCTIONS****Replacement of Thermostat**

CAUTION: The plug must be pulled out before the mainboard group is removed.

- 1) Remove screws which are attached two sides of the thermostat

- 3) Take off all cable connection and pull thermostat bulb out

- 4) Take off the lamp and rotate the lamp holder to the position at below picture
