

Changing The Door Swing Direction to Right Hand

Hold the top hinge cover and remove it toward that direction.

Unscrew the screws fixing the top hinge.

Remove the top hinge.

Displace the top door

Unscrew the two screws fixing the middle hinge and remove it.

Displace the bottom door.

Dismantle both leveling feet and unscrew the bottom hinge fixing screws and remove it.

Unscrew the bottom hinge pin and screw in the next hole.

Then screw the hinge to left side of the refrigerator

Screw the both leveling feet

Remove the stopper and bushing under the upper door.
Then re screw these parts to the other side symmetrically.
(remember the screw for the stopper be screwed to the hole which is closer to the bushing). Do not use cordless screwdriver for these screws.

Replace the top bushing and the top bushing cap at the bottom door.

Unscrew the screws fixing stopper and bushing under the bottom door.
After that screw the other side.

Replace the top hinge cover and hinge cap.

Place the bottom door and rotate the middle hinge by 180°.
After that, Screw to the right side on the middle sheet

Place the top door to the middle hinge.

Screw the top hinge to the top panel.

Place the top hinge cover.

	THERMOSTAT SETTING	

The thermostat automatically regulates the temperature inside the fridge and freezer compartments. To change the temperature the knob can be rotated from position 1 to 5 (5 being the coldest).

For short-term storage of food in the freezer compartment, you can set the knob between 1 and 3 position.

•For long-term storage of food in the freezer compartment, you can set the knob to the 3-4 position.

Note that; the ambient temperature, temperature of the freshly stored food and how often the door is opened, affects the temperature in the refrigerator compartment. If required, change the temperature setting.

Super freezing: This switch shall be used as süper freeze switch. For maximum freezing capacity, please turn on this switch before 24 hours placing fresh food. After placing fresh food in the freezer, 24 hours ON position is generally sufficient. In order to save energy, please turn off this switch after 24 hours from placing fresh food.

CAUTION: The plug must be pulled out before the thermostat is removed.

Remove screw which is attached one side of the thermostat

Firstly take off the button and screw and then take off all cable connection and pull thermostat bulb out

Take off the lamp cover, cable connection and screw at below picture

REPLECAMENT OF THERMOSTAT

Firstly cut off the black band and change the thermostat

Place the thermostat, screws is tightened, insert the button
Connect cables as shown below

Send the thermostat bulb pipe throughout the hole until it end

Plug the black socket to the frige

Close the lamp cover ve screw is tightened which are attached one side of the thermostat.

CAUTION: The plug must be pulled out before the thermostat led is removed.

Screwdriver into the gap and remove the led cover.

Remove screw led

Disconnect the connector and change the led.

Pull the gasket towards starting from top right corner
Slowly pull the rest of the gasket.
Completely remove the gasket from door.

Check the replacement gasket form
Starting with upper right corner , press on the gasket until it fits to its place..
Place the other sides of the gasket with the help of your thumb

After the replacement check if there any non-fitting point on the gasket. Also check if there any opening at the gasket while the door is closed. If so that might cause condensation/icing or insufficient cooling/freezing. To prevent this soften the form of the gasket with the help of a hair dryer or hot water and make sure that all points are closing perfectly.

Vestel refrigerator serial numbers are consist of 22 digits.

(*) Check all pipes, tubes and welding points against gas leakage. (**) Before charging gas to system, change dryer and vacuum at least 30 minutes, then charge the system with amount written on label (***) Compressor primary winding should be around 10 Ω and secondary around 15 Ω (at 25°C ambience temp.)

Excessive Cooling

Is the thermostat setting appropriate to season conditions?

No

Adjust the thermostat according to seasonal conditions.

Yes

Is there any icing formation in refrigerator section?

No

Yes

Is the icing at the whole of back wall (on serpentine)?

No

Yes

Compressor pressure might be low or there might be clogging at the system, Check the gas and pressure level. If there is clogging; clean the system (*) and gas charge again. (**)

Is thermostat connections ok?

Yes

No

Correct the thermostat connections

Replace thermostat

Set thermostat to a lower setting; did thermostat cut-out? (Compressor stops running)

Yes

Check the thermostat bulb; does it touch the end of the pipe? If not push the bulb until end

No

Check the temperature values of fridge section (***) Are they normal?

Yes

Adjust the thermostat. Inform the customer

No

Replace thermostat

(*) Correct the gasket form by the help of hot water and hair dryer.
