

1. This is cooler set value screen.
2. This is super cooling indicator.
3. This is freezer set value screen.
4. This is super freeze indicator.
5. This is alarm symbol.
6. This is economy mode symbol.
7. This is holiday mode symbol.
8. This is child-lock symbol.
9. This enables the cooler value settings to be modified and super cool mode to be activated, if desired. The cooler maybe set to 8, 6, 5, 4, 2 °C super cool.
10. This enables the freezer setting values to be modified and super freeze mode to be activated, if desired. The freezer may be set to -16, -18, -20, -22, -24°C super freeze.
11. This enables the modes (economy, holiday...) to be activated, if desired.

### *Super Freeze Mode*

#### **How would it be used?**

Press the freezer set button until the Super freeze symbol is seen on the screen. The buzzer will beep twice. The mode will be set.

#### **In this mode:**

- Cooler and super cool mode temperatures may be adjusted. In this case super freeze mode will continue.
- Economy and Holiday mode cannot be selected.
- Super freeze mode can be cancelled using the same selection operation.

### *Super Cool Mode*

#### **How would it be used?**

Press the cooler set button until the Super cool symbol is seen on the screen. The buzzer will beep twice. The mode will be set.

#### **In this mode:**

- The freeze and Super freeze temperature mode may be adjusted. Super cool mode will continue in this case.
- Economy and Holiday mode cannot be selected.
- Super cool mode can be cancelled using the same selection operation.

### *Economy Mode*

#### **How would it be used?**

- Push "mode button" until the eco symbol appears.
- If no button is pressed for 1 second. The mode will be set. The eco symbol will blink 3 times.

When the mode is set, the buzzer will beep twice.

- The freezer and refrigerator temperature segments will display "E".
- The economy symbol and E will light till mode finishes.

#### **In this mode:**

- The freezer may be adjusted. When economy mode is cancelled, the selected setting values will commence.
- Cooler may be adjusted. When economy mode is cancelled, the selected setting values will commence.
- Super cool and super freeze modes can be selected. Economy mode is automatically cancelled and the selected mode is activated.
- Holiday mode can be selected after cancelling the economy mode. Then the selected mode is activated.
- To cancel, you will just need to press the mode button.

### *Holiday Mode*

#### **How would it be used?**

- Push the "mode button" until the holiday symbol appears
- If no button is pressed for 1 second. Mode will be set. The holiday symbol will blink 3 times. When the mode is set, the buzzer will beep twice.
- Cooler temperature segment will display "--".
- Holiday symbol and "--" will light till mode finishes.

#### **In this mode:**

- The freezer may be adjusted. When holiday mode is cancelled, the selected setting values will commence.
- Cooler may be adjusted. When holiday mode is cancelled, the selected setting values will commence.
- Super cool and super freeze modes can be selected. Holiday mode is automatically cancelled and the selected mode is activated.
- Economy mode can be selected after cancelling the holiday mode. Then the selected mode is activated.
- To cancel, you will just need to press the mode button.

### *Drink Cool Mode*

#### **When would it be used?**

This mode is used to cool the drinks within an adjustable time.

#### **How would it be used?**

- Press the freezer button for 3 seconds.
- Special animation will begin on the set freezer value screen and 05 will blink on set cooler value screen.
- Press cooler button to adjust the time (05 - 10 - 15 - 20 - 25 - 30 minutes).
- When you select the time, the numbers will blink 3 times on screen and beep twice.
- If no button is pressed within 2 seconds, the time will be set.
- The countdown begins from the adjusted time minute by minute.
- The remaining time will blink on the screen.
- To cancel this mode press the freezer set button for 3 seconds.

### *Screen Saver Mode*

#### **Instructions for use**

- This mode will be activated when you press the mode button for 5 seconds.
- If no button is pressed within 5 seconds when the mode is active, the lights of the control panel will go off.
- If you press any button when the control panel lights are off, the current settings will appear on the screen, and then you can make the adjustment as needed. If you do not cancel the screen saver mode or do not press any button within 5 seconds, the control panel will go off again.
- To cancel screen saver mode press the on mode button for 5 seconds again.
- When screen saver mode is active you can also activate the child lock.
- If no button is pressed within 5 seconds after child lock is activated, the lights of the control panel will switch off. You can see latest settings or modes status after you press any button. You can cancel child lock as described in the instruction of this mode while the control panel light is on .

### ***Child lock function***

#### **When would it be used?**

To prevent children from playing with the buttons and changing the settings you have made, child lock is available in this appliance.

#### **Activating Child Lock**

Press the Freezer and Cooler buttons simultaneously for 5 seconds.

#### **Deactivating Child Lock**

Press the Freezer and Cooler buttons simultaneously for 5 seconds.

**Note:** Child lock will also be deactivated if the electricity is interrupted or the fridge is unplugged

### ***Light Cancelling Mode***

#### **When would it be used?**

- If you want to cancel lights of cooler, you can select this mode.
- While pushing on freezer, cooler, mode buttons, open and close one of the doors for 3 times. The mode will be selected in this way. From now on, the lights will not come on when the function is not cancelled by the same way.
- If you want to cancel this mode, repeat the same process or the mode will automatically cancel itself after 24 hours.

### ***Demo Mode***

#### **Entering Demo mode:**

- Firstly the power is on, secondly within 1 minute user will push mode & freezer button at the same time, Then appliance will go on “demo function” and Demo Symbol will light during the mode.
- All functions can be adjusted to show how they are adjusted to the customer.
- During the demo mode to show the alarm symbol, at the 3th. pushing of the mode button SR alarm symbol and the “SR word” on the 7-segment will be active.

#### **Canceling Demo mode:**

For cancelling; Same operation will be used. If user will push mode & freezer button at the same time, demo function will be cancelled.

When appliance is Demo mode; if plug is removed or there is an electricity breakdown; demo mode will continue with current settings after user plug into or electricity breakdown finish.

### *Cooler Temperature Settings*

- Initial temperature value for the Cooler Setting Indicator is +4 °C.
- Press the cooler button once.
- When you first push this button, the last value will appear on the cooler setting indicator.
- Whenever you press this button, a lower temperature will be set. (+8°C, +6°C, +5°C, +4°C, +2°C, Super cool)
- When you push the cooler set button until the Super cool symbol appears, and if you do not push any button within 1 second, Super Cool will flash.
- If you continue to press the button, it will restart from +8°C.
- The temperature value selected before Holiday Mode, Super Freeze Mode, Super Cool Mode or Economy Mode is activated and will remain the same when the mode is over or cancelled. The appliance continues to operate with this temperature value.

### *Freezer Temperature Settings*

- The initial temperature value for the Freezer Setting Indicator is -18°C.
- Press the set freezer button once.
- When you first push this button, the last set value will blink on the screen.
- Whenever you press this button, a lower temperature will be set (-16°C, -18°C, -20°C, -22°C, -24°C Super freeze).
- When you push the set freezer button until the Super freeze symbol appears, and if you do not push any other button within 1 second, Super Freeze will flash.
- If you continue to press it, it will restart from -16°C.
- The temperature value selected before Holiday Mode, Super Freeze Mode, Super Cool Mode or Economy Mode is activated and will remain the same when the mode is over or cancelled. The appliance continues to operate with this temperature value..

<b>VESTEL</b> <b>WHITE GOODS</b>	<b>NF COMBI – 566 ELECTRONIC - IMD</b>	<b>CUSTOMER SUPPORT</b>
	<b>Warnings about Temperature Adjustments</b>	

- Your temperature adjustments will not be deleted when an energy breakdown occurs.
- It is not recommended that you operate your fridge in environments colder than 10°C in terms of its efficiency.
- Temperature adjustments should be made according to the frequency of door openings and the quantity of food kept inside the fridge.
- Do not pass to another adjustment before completing an adjustment.
- Your fridge should be operated up to 24 hours according to the ambient temperature without interruption after being plugged in to be completely cooled. Do not open doors of your fridge frequently and do not place much food inside it in this period.
- A 5 minute delaying function is applied to prevent damage to the compressor of your fridge, when you take the plug off and then plug it on again to operate it or when an energy breakdown occurs. Your fridge will start to operate normally after 5 minutes.
- Your fridge is designed to operate in the ambient temperature intervals stated in the standards, according to the climate class stated in the information label. We do not recommend operating your fridge out of stated temperatures value limits in terms of cooling effectiveness.

Climate Class	Ambient (°C)
T	16 to 43
ST	16 to 38
N	16 to 32
SN	10 to 32

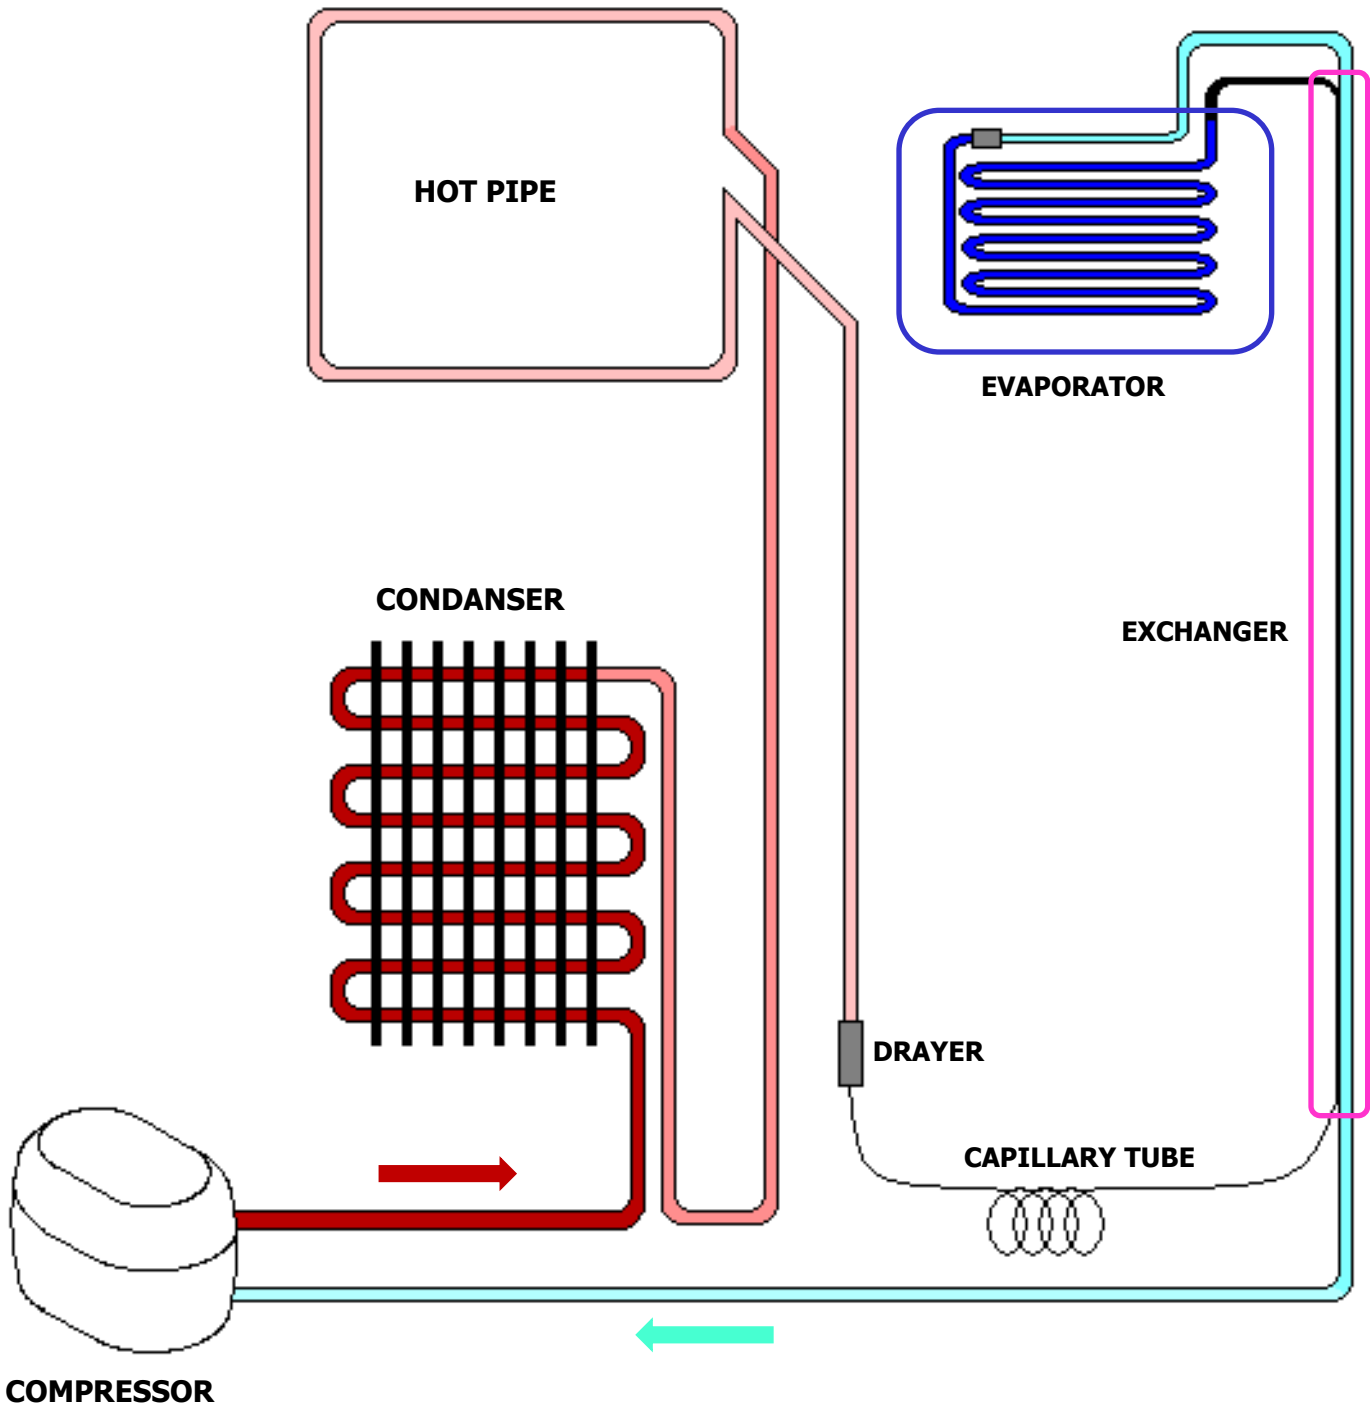

**Note:** If the temperature of the environment is higher than 38°C, the freezer partition temperature cannot be adjusted to -22°C and -24°C. It can only be adjusted to the values of -16°C, -18°C, -20°C.

Refrigerant Cycle Diagram

<b>VESTEL</b> <b>WHITE GOODS</b>	<b>NF COMBI – 566 ELECTRONIC - IMD</b>	<b>CUSTOMER SUPPORT</b>
	<b>Special Programs</b>	

### **When you first start the appliance**

If the freezer and defrost sensors are warmer than  $-5^{\circ}\text{C}$ , then the automatic test starts. The below listed components will be tested respectively with 5 second intervals.

- Middle sheet resistance for 5 seconds
- Defrost heaters for 5 seconds (Fin evaporator resistance, defrost pipe resistance and insulation mullion heater)
- Evaporator fan motor for 5 seconds
- Compressor for 5 seconds

After 5 seconds, the appliance will start to run.

### **Defrost algorithm**

Defrosting activates after 48 hours of total running time of refrigerator or 18 hours of total compressor running time. Up to below mentioned reasons running times might decrease to 12 hours for refrigerator or 14 hours for compressor.

- Amount of ice formed,
- Number of times the door is opened and closed,
- Duration the door remained opened,
- Sudden usage change ,
- Sudden Cooler Compartment temperature increase,
- Sudden Freeze Compartment temperature increase,

### **Defrosting time**

Under normal conditions, defrosting period ends when the defrost sensor measures  $8^{\circ}\text{C}$ . But if the defrosting period exceeds 37 minutes, then the defrosting mode completion temperature will be rised to  $12^{\circ}\text{C}$ .

### **Delay of the compressor run**

Compressor will be started after 5 minutes of defrost mode.

### **Delay of fan motor run**

Fan motor starts after 3 minutes of compressor run.

### **Low Voltage Program**

In case of supply voltage lower than 170 V for more than 5 seconds, the low voltage program will stop the compressor, evaporator fan motor, condenser fan motor and also the super freezing super cooling functions. If this situation happens during the defrost mode, then the appliance will stop during defrosting.

When the supply voltage reaches a value greater than 180V, the appliance will start again from the defrost mode.

If the appliance was not stopped during the defrost mode, then will be stopped for minutes more for compressor secure start-up and will be started from the last setted program.

### **When the electricity is off**

- All the parameters and functions will be kept in the memory (except the child lock function)
- When the electricity is on if the defrost sensor measures  $<5^{\circ}\text{C}$  then the compressor will be started after 5 minutes. If the defrost sensor measures  $>5^{\circ}\text{C}$ , then the compressor will be started immediately.
- The appliance will be started with the last program setted.

	<b>NF COMBI – 566 ELECTRONIC - IMD</b>	<b>CUSTOMER SUPPORT</b>
	<b>Service Model</b>	

**Entering service mode :**

Push freezer temperature button continuously. During this time, open and close the cooler door for least 3 times. The appliance will enter service mode 3 sec. late.

- If there is a faulty situation, error code will be observed on screen. Otherwise nothing will be on the screen.
- Buzzer will sound beep for 0.1 sec. each 5 sec. during service mode.
- Child lock icon will blink
- Service function could be activated by pushing «Mode» button

SERVICE FUNCTIONO	
	While display is on service mode, it could be changed among service functions by touching mode icon
<b>TOUCHING M (MODE) BUTTON ONE TIME.</b>	<b>STARTING MODE</b>
	Eco icon blinks
	The number of components which is controlled is shown at freezer segments of display
	Eco icon goes off when the starting test finishes and then display returns to initial service mode.
<b>TOUCHING M (MODE) BUTTON TWO TIMES.</b>	<b>MANUAL DEFROST</b>
	Holiday icon blinks
	Defrost might be finished manually or automatically.
	Defrost might be finished manually by using the cooling set button. Holiday icon goes off and display returns to initial service mode.
	Automatic defrost operates according to the standard defrost time.
	Holiday icon goes off when he when the manual defrost ends and display returns to initial service mode.
<b>TOUCHING M (MODE) BUTTON THREE TIMES.</b>	<b>DAMPER MOTOR CONTROL MODE (this is a general function for other models which have damper)</b>
	SC icons blink.
	There is no function due to not having damper component in the product
	Unless touch anything on the screen for 5 minutes, this function will be finished.
	SC icons goes off and display returns to initial service mode.
<b>TOUCHING M (MODE) BUTTON FOUR TIMES.</b>	<b>CURRENT TEMPERATURE VALUES INDICATOR</b>
	Sf icons blink.
	Current temp. Value of freezer set sensor is shown on cooler set segment. Freezer set segment shows "1"
	After touching freezer set icon one time, current temp. Value of cooler sensor is shown on cooler set segment. Freezer set segment shows «2"
	After touching freezer set icon one more time, current temp. Value of defrost sensor is shown on cooler set segment. Freezer set segment shows «3"
	After touching freezer set icon one more time, Constant value is shown on cooler set segment due to not being an ambient sensor in the appliance. Freezer set segment shows «4" (this is a general function for other models which have ambient sensor)
	After touching freezer set icon one more time, current temp. Value of cooler serpentine sensor is shown on cooler set segment. Freezer set segment shows «5"
	Unless touch freezer set icon for 5 minutes, function will be finished automatically.
	Touching cooler set icon, function will be finished manually.
	Sf icon goes off and display returns to initial service mode.
<b>TOUCHING M (MODE) BUTTON FIVE TIMES.</b>	<b>DOOR SWITCH CONTROL</b>
	No icons at display
	Cooler set segment gives information about cooler door
	Mode just could be deactivated by cooler set button.
