

DOOR PARTS

This exploded view diagram illustrates the assembly of a refrigerator, showing the main body, doors, drawers, and various internal components. The parts are identified by the following numbered callouts:

- 1-1** through **1-25**: Various electrical components, including wiring harnesses, switches, and control panel parts.
- 2-1** through **2-81**: Door components, including panels, handles, hinges, and internal structural parts.
- 3-1** through **3-10**: Internal components of the upper door, including the evaporator and defrost timer.
- 4-1** through **4-17**: Hinges, brackets, and mounting hardware for the doors.
- 5-1** through **5-21**: Drawer components, including the drawer box, front panel, and runners.
- 6-1** through **6-18**: Components of the lower door, including the evaporator and defrost timer.
- 7-1** through **7-10**: Internal components of the lower door, including the evaporator and defrost timer.
- 8-1** through **8-10**: Components of the lower door, including the evaporator and defrost timer.
- 9-1** through **9-10**: Components of the lower door, including the evaporator and defrost timer.
